

# P.i. Performs GUARANTEED

The high price of fuel is a major concern for people and businesses. As prices continue to reach record-setting levels, fuel economy has become increasingly important for customers everywhere, and people are doing everything they can to stretch their fuel dollars.

AMSOIL P.i. gasoline additive can help. It increases fuel economy, reduces emissions and restores vehicle performance by dissolving and removing combustion chamber, intake valve and fuel injector deposits. Field testing shows AMSOIL P.i. provides an average fuel improvement of 2.3 percent and up to 5.7 percent.

AMSOIL P.i. Performance Improver is so effective the company now offers a money-back guarantee on the product's fuel economy benefits. If the customer does not see fuel economy improvement in his or her vehicle after a first-time use of P.i., AMSOIL will refund the purchase price of the product.

## P.i. Money-Back Guarantee Conditions

The money-back guarantee is good through December 31, 2008 and is open to everyone (including AMSOIL Dealers, Preferred Customers, retail customers, catalog customers, commercial and retail accounts). The P.i. money-back guarantee is limited to vehicles with a minimum of 25,000 miles that have not previously been treated with P.i. and have not undergone any fuel system or fuel injector cleaning procedure. P.i. must be used with a full tank of gas, and the P.i.-treated gas must be run until the tank is near-empty before filling up again. Fuel economy measurement will then be taking on the tankful of gas following the P.i. treated tank.

Customers are eligible for the refund if they do not see a fuel economy improvement following use of the subsequent tank of gas after P.i. treatment. If a customer had not received a fuel economy benefit and wishes to take advantage of the money-back guarantee, he or she may simply download and print the [rebate form](#). The form contains complete qualification details and must be completely filled out and mailed with the P.i. purchase.
